Art Direction

Universe

The playground of the game is set in a human-sized bright forest, inside an amusement park made by tiny fairies.

The pocket-sized structures of the park are crafted by a mix of natural elements and human objects.

The Secret World of Arrietty (2010, Ghibli),
Tinkerbell and The Great Fairy Rescue (2010, Disney),
Tinykin (2022, Splashteam),
Grounded (2020, Obsidian Entertainment)

Graphic style

Dazzling colors and **hand painted style** create a child's tale and cartoonish atmosphere.

Limitations in texturing's complexity favorise a beautiful and a **highly marked modelisation**.

Fortnite (2017, Epic Games),
Grounded (2020, Obsidian Entertainment),
Valorant (2020, Riot Games),
Palia (2023, Singularity 6 Corporation)

Chara Design

The main character is a little rebellious fairy. With a sense of lightness and cuteness, her design represents and highlights the wonder of Tinykinesis.

The enemies of the protagonist are creepy creatures wearing masks made of wood. These purely chaotic goblins have a natural taste for destruction and eccentricity.

Sound Atmosphere

From the bright and childish themes to the sound effects of the rollercoasters, the sound design establishes a **feerie world** and the **identity of the park**.

However, sounds effects and music emphasise **player's powers** and the dangerousness of the situations, highlighting the **nervousness of the fights**.
